Description

Features

- Designed for 8 MHz channel bandwidth
- Low phase noise
- Double SAW filter selectivity
- Wide AGC range
- Maximum output level 115 dB?V
- Compact standalone housing

Technical specification

- Input frequency range 474 ... 858 MHz
- Output frequency range 114 ... 858 MHz
- Channel spacing 8 MHz
- Input level 58...90 dB?V
- Output level 115dB?V
- AGC range 30 dB
- AGC stability + 1,5 dB
