

Corinex AV200 CableLAN Adapter

Corinex AV200 CableLAN Adapter

The Corinex AV200 CableLAN adapter represents a fast and innovative solution for data communications over cable TV networks with no compromise in the quality of your cable television signal. With Corinex CableLAN technology, you have one of the most configurable networks possible, because instead of drag ging long cables everywhere, you just plug in to your existing coaxial cable. Every cable TV socket throughout the building quickly becomes a network connection! And at data rates of up to 200 Mbps, regardless of whether or not the television is on, you'll find that high-bandwidth applications, such as voice, data, streaming audio and video, network games, as well as general shared broadband Internet access, work seamlessly, without interruption, and without long network cables cluttering up your home or office.

Description

Technical Specifications

- ? Standards Compliance IEEE 802.3u
- ? Speed: Up to 200 Mbps on physical layer
- ? LED Status Lights: Power on, Coaxial Cable Link/Activity, Ethernet Link
- ? Interface: 10/100 BaseT Fast Ethernet, One F-Type Connector
- ? Frequency Range used: 2 – 34 MHz
- ? Power Input: 85 to 265 V AC, 50/60 Hz
- ? Dimensions: 148 mm L x 106 mm W x 47 mm H
- ? Transmitted Power spectral density: -56 dBm/Hz
- ? Power Consumption: 10W
- ? Safety & EMI: FCC Part 15, CB/CE and/or international standards approved
- ? Operating Temperature: 0° to 50°C (32°F to 122°F)
- ? Operating Humidity: 10% to 80% non-condensing
