Leírás

Adopting ASIC chip with proprietary intellectual property right:

Embedded 32-bit CPU (ARM7TDMI)
Adopting advanced 0.18-micron technology
Advanced language development environment
Supporting subsequent development of value-added services

Descrambling: Supporting common descrambling algorithm of Europe
DVB-CI interface: Compatible with DVB-CI / PCMCIA
Smart Card interface: ISO7816

Specification

Dimensions: PCMCIA type II
Interface protocols of the host: In full compliance with DVB-CI Profile 1 protocol;
External interface of IC card: Build-in SmartCard reader, in compliance with ISO7816 protocol;
Operating system: Embedded Linux system with proprietary intellectual property rights;
Internal descrambler: Integrated universal DVB descrambler;
MPEG DEMUX: Multi-channel SECTION and PID filter configurable through software;
Enclosure structure: Latest compact structure and design for assembly;
Descramble 4 ~8 TV Channels using one module
